**DETAILED ACTION**

1. Claims 1-13 and 30-32 are pending. Applicant cancelled claims 14-29 and 33.

***Claim Rejections - 35 USC § 103***

2. Claims 1-13 and 30-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Servan-Schreiber et al., US 6,892,354.

Servan discloses a method for advertising on a subscriber terminal having a display screen, e.g. 24, Fig. 3, sending an authorization request via a telecommunication network, e.g. 20, sending at least one advertisement, e.g. 40, Fig. 4, and receiving a reply to the request, e.g. 38, and providing an idling event, e.g. communication idle time. Servan does not disclose the term triggering event. Official Notice is taken that triggering events are common knowledge in the telecommunication art, as are stationary subscriber terminals. To have provided the reply to have been from such a triggering event for Servan would have been obvious to one of ordinary skill in the art.

Applicant's REMARKS have been reviewed, but are moot in light of the new grounds of rejection.

3. Further pertinent references of interest are noted on the attached PTO-892.

***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
